Project Officer
Project ‘Sambhav’
Children with Disabilities of South Asia and Africa have poor access to rehabilitation services. As per WHO, up to 57% persons with disabilities are unable to afford healthcare including rehabilitation services.

Social Problem

What We Plan to Do

Intended Impact

- Deliver High Quality Services
- Robust follow up
- Reduced Cost burden on families

- Expanding partnerships in South Asia and Africa
- Establish/Build Systems and Processes making costs affordable
- Evidence Based Policy Advocacy

Societal Problem and Our Intended Impact
Affordability is fundamental to accessing rehabilitation services and telerehabilitation provides cost effectiveness, quality control and overall robust system to delivering services.
Our Solution

PREPARE
Adapt systems, services, protocols for expansion and scale up appropriate to different regions

MONITORING
